## ABSTRACT

This 49th annual Florida Library directory with statistics edition includes listings for over 1,000 libraries of all types in Florida, with contact named, phone numbers, addresses, and e-mail and web addresses. In addition, there is a section of library statistics, showing data on the use, resources, and financial condition of Florida's libraries. The first section consists of listings for Florida Division of Library and Information Services library organizations, councils, and associations. The second Section is a directory of libraries, with listings divided by public libraries, academic libraries, institutional libraries, and school library media supervisors. The third section consists of a narrative statistical summary of public library data compiled from forms distributed to public libraries in October, 1997, as well as selected historical data. Eighty-six public library administrative units reported. The Fourth section consists of public library data tables on population served (by county); access to library service -- number of outlets, square feet, and Sunday hours; staff -- full-time equivalents and salaries and benefits; operating income and expenditures -- total and percent by source and category, per capita, and capital outlay; collection; library use, and public library cooperatives -- fiscal and use data. Indexes of personnel and libraries arranged by county are included. (DLS)

FLORIDA DEPARTMENT OF STATE

**Sandra B. Mortham**

Secretary of State

We are pleased to provide the 49<sup>th</sup> annual edition of the *Florida Library Directory with Statistics*. This edition, which includes a comprehensive listing of libraries of all types in Florida, along with statistical information on the public libraries, is a celebration of our achievement. After 36 years of providing state aid to public libraries, we now are providing that assistance to all 67 counties. The fireworks on the cover symbolize our excitement over this achievement.

With today's emphasis on measurable evaluation of programs, the collection and use of accurate performance and resource data are increasingly important. Each public library in Florida submits a statistical report to the State Library that provides information on budgets, collections, and services. Compilation and analysis of the data is conducted by the Research Unit in the Bureau of Library Development. This unit also provides tailored data reports and technical assistance upon request.

Public library data are used by local library managers and public administrators for planning, evaluation, and resource allocations. These data are also important for academic and governmental researchers investigating and developing public policy regarding information transfer and access. The information is also submitted to the Federal-State Cooperative System for Public Library Data, a program of the National Center for Education Statistics.

Florida's quality library statistics are the result of a collaborative effort between local public libraries and the State Library of Florida. I along with my staff in the Division of Library and Information Services welcome your comments and suggestions regarding this important annual publication.

  
Secretary of State
